

HEALTHY OLDER ADULT VOLUNTEERS WANTED!

WHAT: The Stanford Memory Lab is looking for healthy older adults to participate in a study on attention and memory.

ELIGIBILITY: Healthy and between the ages of 65 and 80; right-handed; able to lie flat for an MRI scan and hear without aid; no history of memory loss or neurological illness; no MRI-incompatible metal implants; normal or corrected-to-normal vision; and no color blindness.

COMMITMENT: Participation will involve three separate visits:

- Day 1: Cognitive testing (at Stanford)
- Day 2: PET-MRI brain scan (at Stanford)
- Day 3: EEG-fMRI brain scan (at Stanford)

COMPENSATION: Participants will be compensated \$100 for the PET/MRI scan and an additional \$20/hour for the EEG/fMRI and behavioral testing.

INTERESTED? QUESTIONS? CONTACT US! Jen Park (research coordinator) at memorylab@stanford.edu (650) 723-7343

All tests are for research purposes only; results cannot be released for individual health diagnostics.
