WISE Research Roundtable
"Why Are Campuses So Tense, and What Can We Do?"

TUESDAY, JANUARY 28, 2020
4:15 p.m. - 5:45 p.m.
102-103 Physics/Astrophysics
(Kistler Conference Room, 452 Lomita Mall)

Claude Steele

Professor Claude M. Steele is best known for his work on stereotype threat and its application to minority student academic performance. His presentation, and the discussion following with those attending, will focus on research that suggests how we can reduce the ill effects of stereotype threat and build trust toward inclusive and equitable learning experiences in higher education.
