**VISION:**
First-year students will engage in early clinical experiences:
- To provide context about the path ahead
- To influence professional identity formation through reflection of these experiences

**COURSE GOALS:**
Integrate students into the clinical setting
- Develop concrete skills through experiential learning
- Introduce different career paths early during training

**COURSE OBJECTIVES:**
By the end of the ECE course, first-year students will:
- Apply basic clinical skills in a healthcare setting
- Identify connections with concurrent core curriculum
- Reflect on their experiences and its influence on professional identity

**THE EARLY CLINICAL EXPERIENCE CONTINUUM:**

---

**COURSE FORMAT:**

1 unit will be awarded in Q3 after completion of 4 large group seminars and 6 clinical experiences.
