

STANFORD UNIVERSITY

Do you have a hypothalamic-pituitary disorder?

Researchers at Stanford University are currently recruiting individuals with hypothalamic-pituitary disorders to participate in a research study about individuals with these disorders to better understand the role of the pituitary hormones, oxytocin and vasopressin, in social functioning.

In order to participate in this research study you must:

- *Be between the ages of 6 and 17 years*
- *Have a diagnosis of a hypothalamic-pituitary disorder*
- *Be in good medical health aside from the hypothalamic-pituitary disorder*
- *Be willing to provide a blood sample*
- *Be willing to complete cognitive and behavioral tests*
- *Have a parent/caregiver who is willing to complete questionnaires*

You will be reimbursed \$50 for completion of the entire study.

For more information, call (650) 498-5187.
