

Stanford University School of Medicine, Department of Pathology
300 Pasteur Drive, Room L235, Stanford, CA 94305-5324

Dear Applicant,

Thank you for your interest in applying for the Surgical Pathology Fellowship at Stanford University, School of Medicine.

Please note, the following documents are required upon application submission:

- Surgical Pathology Fellowship Application Form
- Current Curriculum Vitae
- Letter of Intent - (personal statement)
- List of References – (provide degrees, titles, phone, address and email address)
- Three Letters of Recommendation addressed directly to: Dr. Megan Troxell, Director of Surgical Path Fellowship Program

Applications and required documents should be submitted by the first week of August, two years prior to start date. Please submit application and letters via email (pdf preferred) to: santamaria@stanford.edu. Letters of Recommendation are to be sent directly by the office of the referee providing the recommendation. Letters of Recommendation may be emailed directly to: santamaria@stanford.edu.

Application and required documents need to be submitted to this office by the first week of August, two years prior to start date. Interviews for the open positions will be conducted beginning in early August through September. Incomplete application packets will not be considered.

The Surgical Pathology Fellowship Program requires at least three year's prior training in anatomic or anatomic and clinical pathology. Our program is a one-year fellowship (ACGME-accredited) that provides advanced, focused and intensive training in diagnostic surgical pathology. Rotations include: "Hot Seat", Frozen Section, sign-out of consultation material (including immunohistochemistry and other special diagnostic techniques), surgical pathology sign-out of residents ("junior attending") and elective time. Elective time may be designed to pursue additional subspecialty training in areas of gynecologic, soft tissue, breast, gastrointestinal, renal, cardiopulmonary, transplantation, molecular pathology, hematopathology, neuropathology, dermatopathology, cytopathology and/or research.

Stipends depend upon the postdoctoral level of training (PGY) and are set by Stanford Health Care.

Please be aware that the Medical Board of California requires all U.S. and Canadian graduates to be licensed in California before they begin their 25th month of approved post graduate training, if the training is in a California institution. This means that if selected you are required to obtain a California medical license before starting the fellowship program. You should allow at least nine months to complete the entire process of securing a California medical license. Please contact the licensing board to request an application.

For non-U.S. and Canadian citizens and residents, the selected applicant will be required to obtain a J1 visa. H-1 visas are not sponsored. For more information on J1 visas, please go to: j1visa.state.gov

Sincerely,

Megan Troxell, MD, PhD
