Description of Expense and Business Purpose:

The Division of Primary Care and Population Health has designated funds for faculty wellness, approved by the Division Chief Dr. Sang-Ick Chang. These funds are intended to provide faculty with a better work-life balance by encouraging healthy behaviors. We have provided clinics with a budget for healthy snacks, reimburse commensality meals, and are now piloting a babysitting reimbursement of up to \$50 to help cover childcare expenses. This encourages our faculty to meet outside of work hours and build relationships, fostering better collaboration and community wellbeing.
