

Summer Quarter Internship Opportunity | Stanford Medicine Department of Urology

We are seeking an individual for a Summer Quarter internship with possible extension to a full 12-month internship related to pediatric bladder health and health education who has training in epidemiology or a related field. The primary mentor is Dr. [Kathleen Kan](#) in the Department of Urology. This internship opportunity will be focused primarily on our Bladder Bootcamp project, a health education program aimed to correct dysfunctional bladder and bowel behaviors that lead to urine accidents, urinary tract infections and bladder pain in children. Dr. Kan has received grant funding to further expand this program into an online platform that will be offered nationally. The applicant will be directly involved with defining the burden of disease locally and nationally as well as developing research methods to understand what parents and families need in such a program. The intern will have the opportunity to collaborate with clinician-scientists, biostatisticians, and the Stanford EdTech department. The intern is able to work remotely.

- \$500 scholarship per quarter offered

The ideal intern will be interested in an academic research career involving epidemiologic research related to public health and health education. The candidate will have:

- Interest in public health, health education or pediatric health policy
- Familiarity with statistical software (SAS, R, Python)
- GIS experience a plus
- Strong training in quantitative epidemiologic methods, familiarity with qualitative methods a plus
- Strong interpersonal skills, willing to collaborate to move a multi-faceted project forward with other team members

Interested applicants should submit the following materials:

1. Curriculum vitae
2. Cover letter describing research interests to be developed during Master's education

Anticipated start date: Summer Quarter 2021
