Asian American, Native Hawaiian, and Pacific Islander (AANHPI) Birth Equity Conference

May 16, 2022 | 10am – 3pm
In-person & Virtual

Frances C. Arrillaga Alumni Center at Stanford University

This conference convenes community leaders, caregivers, and researchers to enhance awareness of and exchange knowledge about AANHPI childbirth processes and outcomes. We aim to develop the groundwork for a collaborative learning network to ensure quality care for AANHPI families. This conference kicks off our larger NIH-funded project *Disparities in Processes and Outcomes of Care Across Asian-American, Native Hawaiian, & Pacific Islander (AANHPI) Populations at Childbirth*, R01HD103662.

Conference and NIH Study Goals

- Partner with communities to investigate and understand:
 - Disparities in care across AANHPI birthing populations
 - The birthing/NICU experiences of AANHPI families to identify potential drivers of disparities
 - Role of hospitals and care providers in AANHPI childbirth/NICU outcomes
- Long-term: We want to create practical solutions that will optimize care for AANHPI populations in California.

Introduction to Keynote

Salma Shariff-Marco, PhD, MPH

Associate Adjunct Professor

Department of Biostatistics and Epidemiology, UCSF

Co-Investigator

Disparities in Processes and Outcomes of Care Across Asian-American, Native Hawaiian & Pacific Islander (AANHPI) Populations at Childbirth

Dr. Shariff-Marco first worked with Dr. Gee during her post-doctoral training at the National Cancer Institute, on the development of a survey instrument to assess self-reported experiences of racial and ethnic discrimination for the California Health Interview Survey. Since then, they have continued to collaborate on studies of Asian American health and health inequities, examining the role of structural and social determinants of health.

#AANHPIbirthequity

May 16, 2022

8

Keynote: Dr. Gilbert Gee

Gilbert Gee, PhD

Professor, Department of Community Health Sciences
Fielding School of Public Health, UCLA

Dr. Gee's research focuses on the social determinants of health inequities of racial, ethnic, and immigrant minority populations using a multi-level and life course perspective. A primary line of his research focuses on conceptualizing and measuring racial discrimination, and in understanding how discrimination may be related to illness. He has also published more broadly on the topics of stress, neighborhoods, immigration, environmental exposures, occupational health, discrimination and on Asian American populations.

Hierarchical Algorithm to Identify Race and Ethnicity

- Those who self-reported to be
 - Native Hawaiian in any of the three race fields were categorized into the group of “Native Hawaiian”
 - GUAMANIAN, SAMOAN, or PACIFIC ISLANDER in any of the three race fields were categorized into the group of “Other PI”
 - in any of the Asian groups in any of the three race fields were categorized as follows:
 - Single specific Asian American group
 - Asian American with Asian American multiple “origins”
 - Asian American with non-Asian American multiple race categories
- Hispanics in the ethnicity field regardless of **categories below**
- Those who self-reported to be
 - White in the first race field were categorized into the group of “Non-Hispanic White”
 - Black in the first race field were categorized into the group of “Non-Hispanic Black”

31

32

33

34

Take home points

- Substantial variation across AANHPI groups
- **Other Pacific Islander** population experiences clinical challenges deserving additional attention
- **Infants of mixed race** are vulnerable to possible differences in care processes
- These are preliminary findings that require more analysis

#AANHPIbirthequity

37

Safety net hospitals and respectful, equitable and quality care for AANHPI families: The Santa Clara Valley Medical Center experience

Maternal

James Byrne, MD
Mora Oommen, MA

Neonatal

Priya Jegatheesan, MD
Laura Berritto, MHA, BSN, RNC
Sangeeta Mallik, PhD
Rupatee "Polly" Patel DNP, MS,
BSN, BC-PNP, BC-PHN, IBCLC

#AANHPIbirthequity

May 16, 2022

38

Key Issues

#AANHPIbirthequity

May 16, 2022

39

Breakout Sessions: Topics

- **Maternal health:** includes experiences of pregnancy/childbirth, and specific outcomes such as cesarean, induction, episiotomy, severe maternal morbidity
- **Neonatal health:** includes hospital postpartum practices, lactation support and breast milk feeding; NICU care of very low birthweight infants and clinical quality of care and outcomes measures
- **Community health:** includes prenatal and postpartum maternity care interactions and parental mental health; infant feeding and postpartum support, including local organizations

#AANHPIbirthequity

May 16, 2022

40

Breakout Sessions: Questions

1. Part of the goal of the conference is to think more deeply and critically about the disaggregation of AANHPI health data. How will disaggregating data around [TOPIC] benefit AANHPI families?
2. Thinking about [TOPIC], what are barriers to quality? What are potential/existing solutions to these barriers?
3. How can the broader medical community support AANHPI families to have positive birth, postpartum, and NICU experiences?

#AANHPIbirthequity

May 16, 2022

41

Breakout Facilitators

IN PERSON

Maternal: Leslie Kowalewski, Susan Perez
Neonatal: Henry Lee, Suzan Carmichael
Community: Rebecca Robinson, Anna Sutton

Scan for Zoom link

VIRTUAL

Attendee Note: Please limit each room to only **40** persons. If you see the limit has been reached, please choose a new room. Thank you for your cooperation.

Maternal 1: Valerie Cape
Maternal 2: Christine Morton
Maternal 3: Emily McCormick
Maternal 4: Curisa Tucker
Neonatal 1: Christina Oldini
Neonatal 2: Shamita Punjabi
Neonatal 3: Sheila Razdan
Community 1: Caroline Toney-Noland
Community 2: Marina Magalhaes
Community 3: Salma Shariff-Marco/Laura Hedli

42

Breakout Rooms

Open the Breakouts window by clicking the 4 boxes icon with “Breakout Rooms” towards the right of your Zoom menu bar.

#AANHPIbirthequity

May 16, 2022

43

How to join your breakout room

Click the **blue Join** button to join a room. The rooms are organized by topic: **maternal health, neonatal health, and community health**. There will be multiple rooms addressing the same topic. Pick the topic you'd like to explore, and select to join any of the rooms addressing that topic.

This icon tells you how many participants are in each breakout room. If you notice this number exceeds 40, please choose another breakout room.

Once you've selected a room, a small pop up window will show up asking “Yes” or “No” to confirm that's the room you want to join.

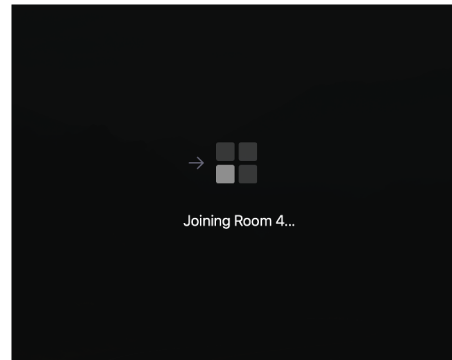

#AANHPIbirthequity

May 16, 2022

44

The Joining Experience

While in the process of joining a room, your view will change as the the transition is processing.

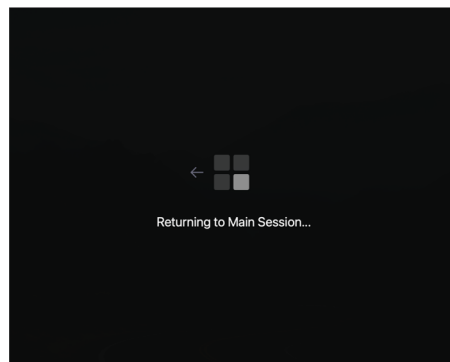

#AANHPIbirthequity

May 16, 2022

45

When you're returning to the main room...

You'll be welcomed with this loading page as you are transitioning from the Breakout Rooms.

46

Report Outs

- In person attendees raise hand and microphone will be brought to you
- Virtual attendees put comments and questions in chat – our hosts will moderate

Word cloud from Disparity Stories collected via registration survey

#AANHPIbirthequity

May 16, 2022

47

Wrap

Latha Palaniappan

- Gap btw representation and funding

Gilbert Gee

- Incredible diversity - aggregation creates mush, need for disaggregation
- Language (linguistic isolation) - Sampling issues, bias built into research
- AANHPI - Most rapidly growing group
- Difference btw AA and NHPI
- Cultural misalignment-acculturation (difficult topics, talking about death, religion) need input from community members
- Nativity, ignores secular trends in other countries
- Discrimination is easy to see - structural racism is difficult to see - often times Asians are visible only in tables but not actually highlighted, often rendered invisible

#AANHPIbirthequity

May 16, 2022

48

Wrap – Community groups

Skye Shodahl

- Model minority
- Importance of disaggregation

Ruta Aiono

- Don't treat PI as an afterthought
- Go to community organizations bearing gifts, get the stories
- Look to NZ/Australia for PI specific education

Grace Yee

- Chinese immigration, lack of translation, culturally appropriate
- Reframe cultural attributes as assets

Deepika Goyal

- AA mental health

#AANHPIbirthequity

May 16, 2022

49

Wrap

SCVMC

- Transcultural model and humility
- Individualize
- Follow through

#AANHPIbirthequity

May 16, 2022

50

Big Picture

- AANHPI: >6% of population, 0.17% of NIH funding (1992-2018 – Doan et al JAMA Open)
- Population of vast diversity
 - Offers both scientific opportunity and challenges
 - Finding the right balance of lumping and splitting
 - Think beyond your own areas of interest, and think broad and intersectional
 - Try and pick the big priorities – a few important ones
 - Think innovation in ways of doing population/clinical studies

#AANHPIbirthequity

May 16, 2022

51

Types of projects for funding - Examples

- **Infrastructural study:** Multi-center multi-ethnic cohort of the most populous AsA and NHPI groups using a “populomics” approach to measure individual, social, environmental risk factors, early life-course exposures, for etiologic studies of multiple birth outcomes.
 - Hybrid recruitment? Efficiency? Focus on a few informative sub-populations? Over-sampling of some groups? Links to other cohorts nationally/internationally?
- **Thematic areas for smaller initiatives:**
 - Methodological –e.g., acculturation, migration, racism, lifestyles
 - Focused, innovative, high impact topics
 - Important topics with scant data
 - Generalizable scientific areas
 - Secondary data analyses

#AANHPIbirthequity

May 16, 2022

52

Putting the pieces together

- Missed Opportunity – can we disaggregate Asian Pacific Islanders in existing National Datasets according to US Census categories (harmonize for denominator data)
- RFAs for secondary analysis for existing datasets
- Population Science for the Future- Opportunity to use new consumer digital technologies for risk factor/outcome monitoring (Fitbit, Applewatch)
- Hybrid approach with EHR – using patient population for sampling frame to do targeted recruitment for in depth data collection, then for passive collection of longitudinal outcomes
- Biobanking and Sample repositories, clinical remnant specimens to leverage across disciplines and lower barriers for participant entry
- Framework to study multiple/mixed race/ethnicity – 1 in 7 babies are mixed race, 20% of mixed race babies are API mixed race
- What would you write in the RFA, PA, RFP?)

#AANHPIbirthequity

May 16, 2022

53

Next Steps

- Ongoing collaboration
- Post conference evaluation – will be sent via email
 - Who or what topics were missing?
 - How do you want to stay engaged with our project?
 - What did you learn that will help you in the work you do?

#AANHPIbirthequity
