

Child and Adolescent Psychiatrist – Pediatric Oncology & Epilepsy

The Department of Psychiatry and Behavioral Sciences at Stanford University School of Medicine is seeking a fulltime physician faculty member in the Clinician Educator Line to conduct clinical care and teaching in the Divisions of Pediatric Oncology and Pediatric Epilepsy at Lucile Packard Children's Hospital at Stanford (LPCCH). This is an outpatient role with time divided equally between the two services. The position will be based at the Department of Psychiatry and Behavioral Sciences.

The equivalent of 50% of the candidate's time will be in the Division of Pediatric Oncology with a potential for a leadership role in the future. It is expected that there will be considerable expansion in this program over the next few years with the hiring of additional psychologists, a pediatric neuropsychologist, and social workers to expand the nature of psychological services provided at LPCCH. The candidate will provide psychiatric evaluations for newly diagnosed patients in oncology and provide psychotherapeutic and psychopharmacological treatment for patients with a wide range of ecological conditions, including patients in the pediatric stem cell transplant program.

The equivalent of 50% of the candidate's time will be in the Pediatric Epilepsy Clinic and will join a team of experts that include pediatric epileptologists, neurosurgeons, registered EEG technologists, neuroradiologists, neuropsychologist and dietitians that all are experts in the care of children with epilepsy. Responsibilities in this program will include providing psychiatric consultation and treatment to youth with epilepsy who are experiencing psychiatric disorders.

Although much of the work will be in the outpatient setting, the candidate will also help with liaison between the inpatient pediatric psychiatry consultation-liaison service at LPCCH. There will be an opportunity to participate in teaching and supervisory activities and to engage in collaborative research projects.

Applicants should have experience in evaluating and treating both children and adolescents with a broad spectrum of presenting problems. Expertise in pediatric consultation liaison psychiatry is preferred. The successful candidate will be offered opportunities for advanced training in pediatric hypnosis to supplement their clinical work. We are currently accepting applications and review will continue on a rolling basis until the position is filled.

Rank and salary will be commensurate with experience.

General Psychiatrist Base Pay Range

Clinical Assistant Professor: \$230k - \$242k

Clinical Associate Professor: \$251k - \$263k

Clinical Professor: \$280k - \$340k

This position commands a competitive salary enhanced by an attractive benefits package, including, but not limited to, generous housing assistance and home purchase programs, bonus programs, paid vacation time, paid personal time, as well as health/dental/vision benefits, paid malpractice, and 403(b) plans.

Stanford is an equal employment opportunity and affirmative action employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, protected veteran status, or any other characteristic protected by law. Stanford also welcomes applications from others who would bring additional dimensions to the University's research, teaching, and clinical missions.

Interested candidates should send a cover letter and current curriculum vitae via e-mail to:
