

Do you care for your spouse or partner who has been affected by memory loss?

The SHARE Lab is doing a research study to promote the quality of caregiving and well being of both people with early-stage Alzheimer's disease (AD) and their spousal caregivers.

Help improve the lives of couple living with AD by joining!

WHO CAN PARTICIPATE

Caregivers and their spouses/partners who:

- Are age 60 and older
- Have received a diagnosis of mild to moderate AD
- Live at home

WHAT DOES THIS STUDY INVOLVE

- One 60-90 minute interview with the couple
- One 10 minute follow-up call in 6 months
- Optional parts: (a) collection of small bits of hair, and (b) another 60 minute interview

Each couple will receive up to \$190 for joining.

For questions about the study, please contact (530) 771-6317 or sharelab@ucdavis.edu
