

Video Player

The Video Player component plays video hosted on the MediaSpace platform. This component is the 'window' to the video - all the video content controls are performed within MediaSpace.

Features

- Simple import using Video ID
- Auto play
- Caption
- Closed captions (via MediaSpace)

Embed videos hosted in MediaSpace

Pro Tips

- Use MediaSpace for Stanford owned content
- For multiple videos on one page, try the Video Playlist component
- MediaSpace has cc, quiz, chapter and privacy options
- It's not recommended to use the Auto Play feature
- Video scales to fit the column space
- The External iFrame component can work for video not on YouTube or MediaSpace
