

# Video Playlist

The Video Playlist component plays video playlists created on the MediaSpace platform. This component is the 'window' to the video - all the video content controls are performed within MediaSpace.

*Embed a series of MediaSpace videos in a single player*

## Features

- Simple import using playlist ID
- Auto Play
- Custom captions
- Closed captions (via MediaSpace)

## Pro Tips

- Use MediaSpace for Stanford owned content
- For a single video, try the Video Playlist component
- MediaSpace has cc, quiz, chapter and privacy options
- It's not recommended to use the Auto Play feature
- Video scales to fit the column space
- The External iFrame component can work for video not on YouTube or MediaSpace
