

Seperator Component

Description of Component

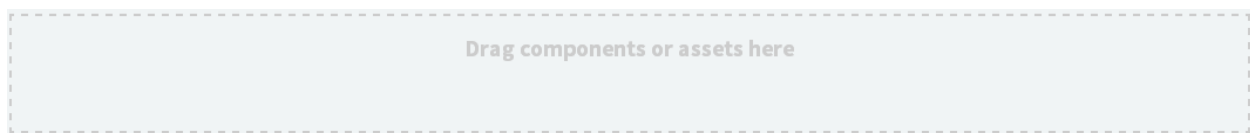

The separator component is used to add a horizontal line that separates content on your web page. Use it as a visual to break up content or where a horizontal line is necessary to denote sections of a page.

How to Use the Component

1. You can identify the Separator component in the Web Author toolkit as follows:

2. Drag the component onto the page in the place where you want the separator.

3. Or, right click and select New.

The separator adds a horizontal line that separates content on your web page.
