

STANFORD MATERNAL AND CHILD HEALTH RESEARCH INSTITUTE

Uytengsu-Hamilton 22q11 Neuropsychiatry Research Awards Program

Stanford Applications – Full Proposal Policy

ELIGIBILITY

Research must be related to the specific mission of the Stanford MCHRI Uytengsu-Hamilton 22q11 Neuropsychiatry Research Awards Program which is to improve the neurocognitive outcomes and behavioral symptoms of 22q11.2 Deletion Syndrome (22q11.2DS). The program specifically seeks to identify strategies with potential for patient impact within 5 years, however short-term and long-term therapeutic approaches and basic science proposals will be considered for funding if the scientific rationale is compelling.

This program will support a wide range of scientific approaches in the following areas:

- I. Basic and clinical translational research, including but not limited to stem cell biology, neuroscience, genomics and novel therapeutics (up to a maximum of \$150K/year, requests at a lower level of funding are welcome)
- II. Data science, bioinformatics and integrative medicine (up to a maximum of \$100K/year, requests at a lower level of funding are welcome)

Eligible applicants must be Stanford faculty holding Clinician Educator (CE), University Tenure Line (UTL), Research (NTL-Research), or Medical Center line (MCL) positions for the duration of the award. A multi-PI approach is strongly encouraged for this initiative where at least two of the lead investigators are from different disciplines and schools. Collaborations between basic and

physician scientists are particularly encouraged. Applications may include co-investigators from other research organizations. Single-PI applications will be considered if the scientific rationale is compelling.

Applicants may not be funded by another Stanford MCHRI 22q11.2DS Neuropsychiatry Research Awards Program award at the time of application (neither PI or Co-PIs). Resubmission proposals, and new proposals from applicants not funded in previous cycles, are eligible.

This program will fund innovative projects in the following categories:

- **Category A:** Research at Stanford University (up to 4 awards)
- **Category B:** Research external to Stanford University (up to 1 award)

APPLICATION

Cover Page (using format provided)

Lay Summary:

- Outline the importance and clinical need for the proposed research, in a short paragraph using plain language aimed at a general audience. Describe how the proposed research would generate new knowledge of neuropsychiatric disorders associated with 22q11.2DS and the potential therapeutic impact or benefit to people with 22q11.2DS in the short or long term.

Research Proposal:

- Concise description of the project aims, hypothesis, background, preliminary studies (if available), study design and methods, potential limitations, research team expertise and capabilities, research timeline, multi-year budget and IRB approval letter.
- Proposals should include a plan for statistical analyses and a brief description of sample size and statistical power calculations.
- Proposals should clearly articulate the relevance to 22q11.2DS and potential for patient impact.
- The proposal should be a maximum six pages text, not including references, and no more than five additional pages of attachments or appendices.

Research Team:

For all members of the proposal submit:

- NIH Biosketch and “Other Support Page”

IRB Approval (Approved Before Application):

IRB application must be submitted *prior* to the MCHRI application submission deadline *and* the IRB review meeting date stated in the MCHRI application. If there is an approval letter, it must be attached with the application. If awarded, the award cannot be approved without the approved protocols. For more information, please see: <http://humansubjects.stanford.edu/>

Biostatistical Consultation

A biostatistical consult is *required* for all human-based studies and those with power calculations.

As part of a partnership with the Stanford Quantitative Sciences Unit (QSU), MCHRI grant applicants may request services as needed to support the success of their research project (*most services at no charge to the investigator*). Their expertise is available for consultation, the development of grant proposals, and implementation of funded projects. Click [here](#) to submit a request directly to the QSU. Request QSU

consults no later than 4 weeks prior to submission deadline.

Patient Oriented Research at SCH

Studies involving patients at Stanford Children’s Health (SCH) must contact the SCH Clinical Research Support Office *early in the study design phase* by emailing crso@stanfordchildrens.org to ensure hospital units involved can assess feasibility and resource requirements are taken into consideration, including hospital costs. Studies that would occur at SCH without CRSO consultation will not be reviewed or may be asked to resubmit in the next cycle.

AWARD

Up to (I) \$150,000 / year or (II) \$100,000 / year for up to two years. Unexpended funds will be returned to the MCHRI after the performance period (see No-Cost Extensions below).

Award may be used for:

- Research personnel
- PI salary
- Computer software (must be justified), supplies or other materials/ services relevant to the research project
- Travel, symposia, or seminars which are an integral part of the proposal

Award may NOT be used for:

- Other travel, conference fees, tuition, or classes
- Membership dues, journal subscriptions, books
- Office supplies, ITCC communications
- Poster presentations, abstract submissions
- Computer equipment (e.g. iPads, laptops, tablets, smartphones, and other related technologies), software, or accessories
- Any other indirect research costs including subrecipient F&A costs

NO-COST EXTENSIONS

Requests must be submitted at least sixty (60) days prior to the end date on the award letter. Requests

are considered on a case-by-case basis. Not all requests are approved. Only one extension is granted per project.

SELECTION PROCESS

Proposals are reviewed by the Stanford MCHRI Uytengsu-Hamilton 22q11 Neuropsychiatry Research Awards Program Scientific Advisory Board. Current SAB membership is available on the MCHRI website. Assessments will be based on the significance, innovation and approach of the proposed research; research environment and investigator team; relevance and potential impact of the research on the neuropsychiatric outcomes of 22q11.2DS.

AWARDEE RESPONSIBILITIES

The PI will take responsibility for the research idea, development methods, supervision and conduct of the study in addition to the following:

- Successful applicants will become members of the Stanford MCHRI Uytengsu-Hamilton 22q11 Neuropsychiatry Research network. The members are expected to attend regular meetings and demonstrate scholarly stewardship within the program through scientific collaboration and intellectual contribution to the programs shared mission.
- Member of MCHRI, keep Stanford Medicine Profile (formerly-CAP) updated, and utilize “Permit PubMed Import” feature.
- Submit reports in a timely manner, including an annual Progress and Financial Report, and a Final Progress and Financial Report within 30 days of the award end date.
- Provide updates in all Progress Reports on funding status from external and/or internal sources.
- Submit progress reports for up to 3 years following the award end date that will include

information about grants submitted, publications, employment, and new research funding resulting from this award.

- Present the results of their research when asked.
- Acknowledge the research support of the Stanford Maternal and Child Health Research Institute and Stanford MCHRI Uytengsu-Hamilton 22q11 Neuropsychiatry Research Awards Program in all publications, abstracts, presentations, press releases, and inventions resulting from this award as follows:

“The project described in this publication was supported by the Stanford Maternal and Child Health Research Institute Uytengsu-Hamilton 22Q11 Neuropsychiatry Research Awards Program.”

MCHRI award recipients who have not acknowledged the Stanford MCHRI Uytengsu-Hamilton 22q11 Neuropsychiatry Research Awards Program are not eligible for future awards sponsored by the MCHRI.

TERM OF AWARD

All awardees are limited to a single award of up to 2 years. Should there be a change in the awardee’s role that significantly alters their ability to carry out their responsibilities, the award will be forfeited prior to the completion of the term. However, if there have been unusual occurrences then the awardee may request a deferral or leave of absence from the award; this request will be adjudicated by the Director of the MCHRI. If a deferral is approved, the end date of this award will be adjusted accordingly by MCHRI administration.
