3801 Miranda Avenue
Palo Alto, CA 94304

- Repetitive Transcranial Magnetic Stimulation (rTMS) delivers brain stimulation in an outpatient clinic.
- Participants receive either active or sham treatments. Those that receive sham will have the option to receive active treatments.
- This study requires frequent visits to the Palo Alto VA for about 1 month with a 4 month follow-up visit.
- Participants will receive research treatments at no cost to them and will receive financial compensation for travel and their time.
