

New, Interactive Online Tool Helps Predict Best Heart-Disease Surgery for Patients

TOP STORY

What kind of heart surgery is right for you? Developed by Mark Hlatky, MD, and his team, the "**Coronary Heart Disease Procedure Calculator**" predicts a patient's chances of living longer after an angioplasty or coronary artery bypass surgery. The tool is based on traits such as gender, age, and personal habits like smoking. [Learn more »](#)
